

AmazingMaths

The AmazingMaths week is from November 26 to 30, 2018.

Accessible and motivational materials available all year for teachers and students of elementary and secondary levels

➤ *Mathemagic*

- Watch a video of a magic trick in class
- Make it an activity with your students by following our accompanying document, or innovate!
- Highlight mathematics: the explanations are available on the website. Some solutions are even available in video form!
- Bring your students to become *mathematicians*!
- Create links with the curriculum with our accompanying documents

➤ *Math Puzzles For All*

- Several puzzles are presented in video form, which is ideal for an activity in class
- Many more puzzles - and their solution - are available on the website

➤ *Math Journey "Pirates and Discoveries"*

- 5 challenges to meet in class from November to April. Take on the challenges that you want!
- For all elementary grades: make it an activity for the whole school
- Wonderful prizes to win and a lot of fun with students

➤ *Math Challenges*

- 3 challenges presented to secondary classes between September and April
- Meet the challenges and get a chance to win great prizes

➤ *Mathematical Activities*

➤ *And much more...*
